WHAT IS PSYCH DAY?

This year marks the 52nd Annual Psych Day! It is the largest event the Psychology Department has in the calendar year. This event is...

- open to all students on campus
- aimed to give our students information about programs and opportunities related to psychology

WHAT CAN I DO? ✨

Our organization invites local grad school representatives, research labs, and other campus-affiliated organizations to share their programs and opportunities to students.

Drop by the psych quad to explore these resources! There will also be...

- food & fun booths
- research recruitment & networking
- workshops
- a special keynote speaker
- and so much more!

WHAT IS THE RESEARCH COMPETITION?

One important element of Psych Day is the research competition. Psychology students currently involved in research can submit abstracts and present posters to a group of doctoral judges.

Students can present proposed or completed undergraduate or graduate research and can win a prize of \$100.

WHO IS OUR KEYNOTE + SPEAKER?

Another one of the most important things of Psych Day is our keynote speaker.

This year, we have invited Dr. Chorswang Ngin, who is a social cultural anthropologist, an award-winning author, and the founder of the Asian/Asian American Studies B.A. degree & co-founder of College of Ethnic Studies (CoES) at CSULA. Come to hear her talk more about the challenges and the resilience of asylum seekers!
